Experiment 11

Deployment and Migration of the Student Admission Application in Zoho Creator

Aim

To deploy and migrate the Student Admission Enquiry Management (Advanced Edition) application in Zoho Creator from a development environment to a production environment while maintaining its forms, reports, pages, workflows and data.

Procedure

1. Log in to Zoho Creator and open the Student Admission Enquiry Management (Advanced Edition) application.

2. Prepare the application by verifying forms, reports, pages, Deluge scripts and workflows.

3. Test enquiry submission, lookup behaviour, fee calculation, QR generation and notifications.

4. Back up the required application data before migration.

5. Package the application using the available deployment/export options.

6. Publish it from Development to Stage and then to Production.

7. Configure dependencies such as users, permissions, connections and email settings.

8. Validate the deployment in the target environment.

9. Complete migration after confirming that the application and required data are available in Production.

Environments

Environment	Purpose
Development	Build and change the Admission Enquiry form, reports and workflows
Stage	Test the packaged version safely without affecting live applicants
Production	Live environment used by the Admission Cell and applicants

Deployment Checklist

Step	Check	Expected Result
1. Prepare	Forms, reports, scripts and workflows reviewed	No errors
2. Test	Submission, lookup, fee, QR and notifications	All features work
3. Back up	Schema + data backup	Backup available
4. Publish to Stage	Tested package	Application appears in Stage
5. Validate	Demo users test permissions	Features and permissions work
6. Publish to Production	Promote tested version	Application available to users
